

## **Bladder Diary Instructions**

### **UROLOGISTS**

Aaron L. Bey, MD  
Karl B. Braun, MD  
Philip J. Buffington, MD  
Kevin G. Campbell, MD  
Christopher Cirulli, MD  
James F. Davison, MD  
Mark G. Delworth, MD  
Shekar Dheenani, MD  
Igor Dumbadze, MD  
Michael W. Dusing, MD  
Brooke B. Edwards, MD  
Edward R. Elicker, MD  
Doug E. Feeney, MD  
Ryan M. Flynn, MD  
Matthew R. Fulton, MD  
Eric O. Haaff, MD  
Mark R. Howard, MD  
Gary M. Kirsh, MD  
Hari P. Kothagal, MD  
Eric J. Kuhn, MD  
Robert J. Larke, MD  
Inayat K. Malik, MD  
David C. Miller MD  
William B. Monnig, MD  
Benjamin E. Niver, MD  
Marc J. Pliskin, DO  
Daniel F. Robertshaw, MD  
Rebecca A. Roedersheimer, MD  
Michael B. Rousseau, MD  
B. Robert Schwartz, MD  
Brian F. Shay, MD  
Martin J. Walsh II, MD  
J.D. Williams, MD  
Patrick M. Wirtz, MD  
Dirk M. Wonnell, MD  
Jeffrey W. Zipkin, MD

### **PATHOLOGY LABORATORY**

Cynthia D. Westermann, MD

### **AFFILIATED PROVIDERS**

### **RADIATION ONCOLOGISTS**

Peter R. Fried, MD  
Jeffrey I. Grass, MD  
Elizabeth H. Levick, MD

### **ANESTHESIOLOGISTS**

Jeffrey S. Philip, MD  
Glenn J. Suntay, MD

### **PAIN MANAGEMENT**

Gururau Sudarshan, MD  
Atul Chandoke, MD

### **MALE INFERTILITY**

Shane Russell, MD

### **PELVIC PHYSICAL THERAPY**

Kathleen Novicki, PT, PRPC

### **What is a Bladder Diary?**

A bladder diary is a 24-hour recording of your liquid intake and urine output. The information recorded can help your healthcare provider understand your fluid balance, urinary frequency, functional bladder capacity (how much your bladder holds in your own environment) and many other aspects important to bladder function.

### **When is a Bladder Diary Used?**

Your healthcare provider may request that you complete a diary to evaluate urinary frequency, urgency or incontinence. You may also choose to complete a diary before you see the healthcare provider about a bladder problem. A bladder diary can point to any dietary or behavioral factors that may be contributing to your bladder symptoms.

### **How to Complete the Diary:**

1. Begin and end the diary at the same time each day (example: begin when you wake up at (6 a.m.) and end at 6 a.m. the following day).
2. Record the fluid intake to the nearest ounce. A very reasonable estimation (8 oz. cup of juice, 12 oz. coke, or 20 oz. water) is appropriate.
3. Measure urine output with either a scaled collection device that is placed beneath your toilet seat (sometimes these are obtained at your doctor's office) or by urinating into a large disposable cup that you know the volume of. Both a collection device and a cup can be rinsed in the tub or sink after use and kept next to the toilet until the diary is complete.
4. Collect at least one full day of information.
5. Be as accurate a possible! The diaries are most useful when every intake and output in the 24-hour period is recorded.

### **Other helpful hints:**

1. Print as many pages of the diary as necessary.
2. Don't forget to bring your completed diaries back to the doctor's office at your return visit.
